

Designated Standards Maintenance  
Organizations (DSMO)  
Presentation to NCVHS Subcommittee on  
Standards  
November 2011

# Current HIPAA Processes

# I have a business problem to solve...

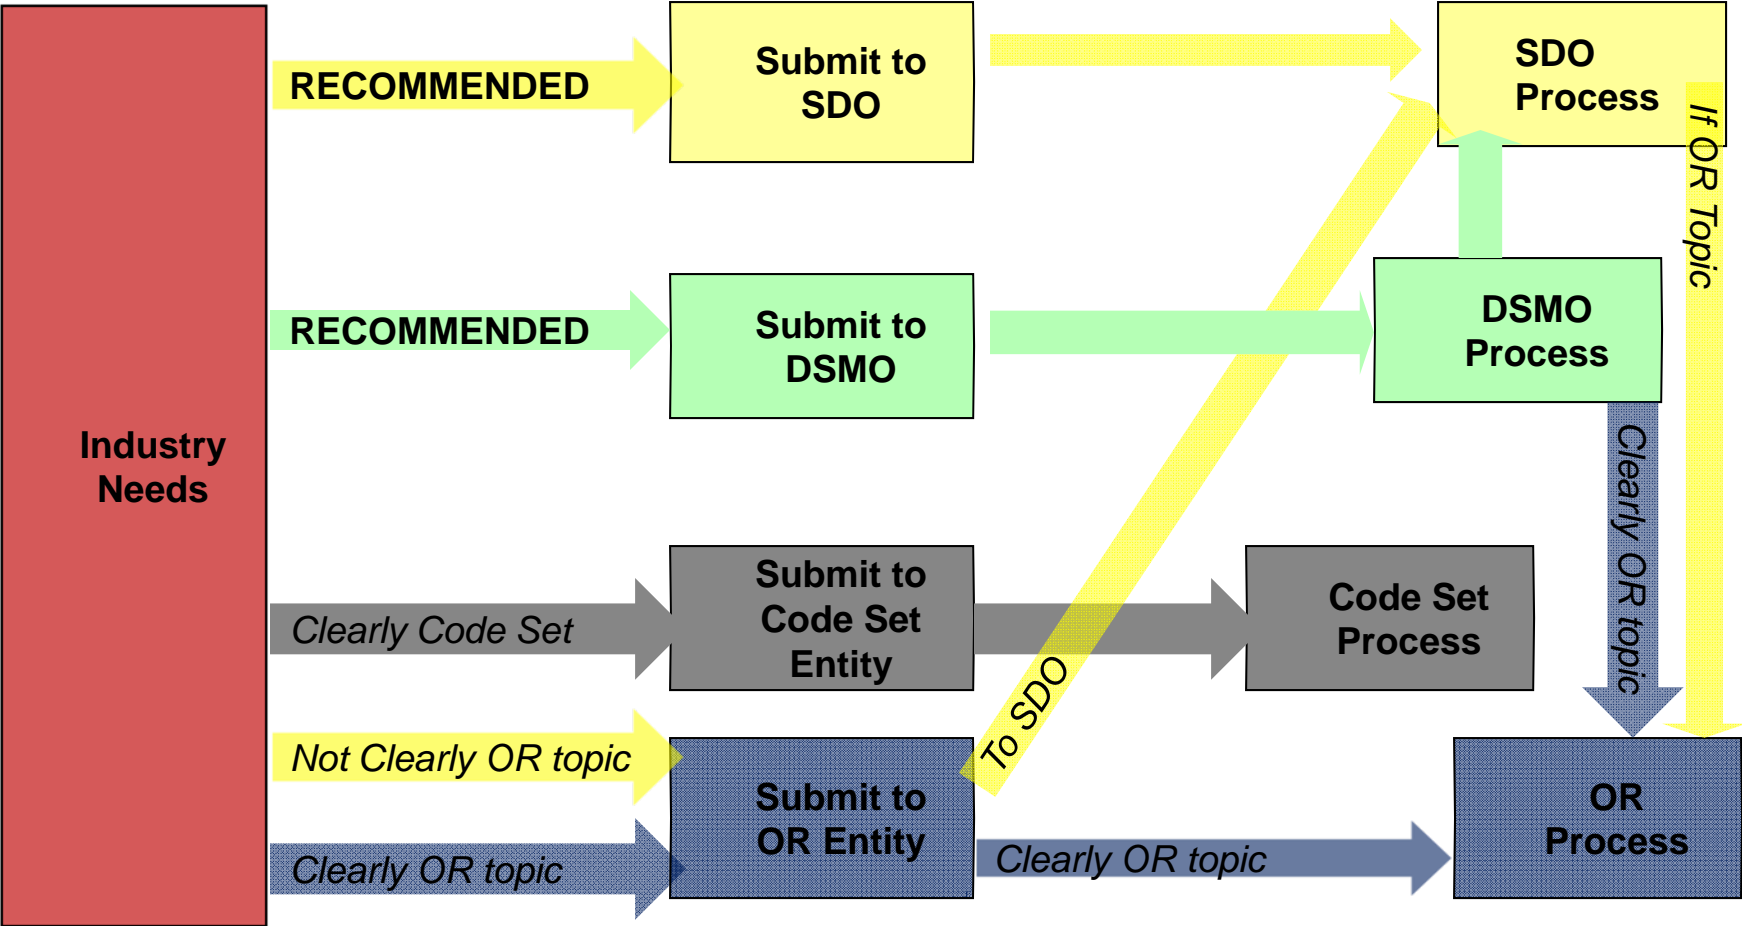

# HIPAA Process with Operating Rules

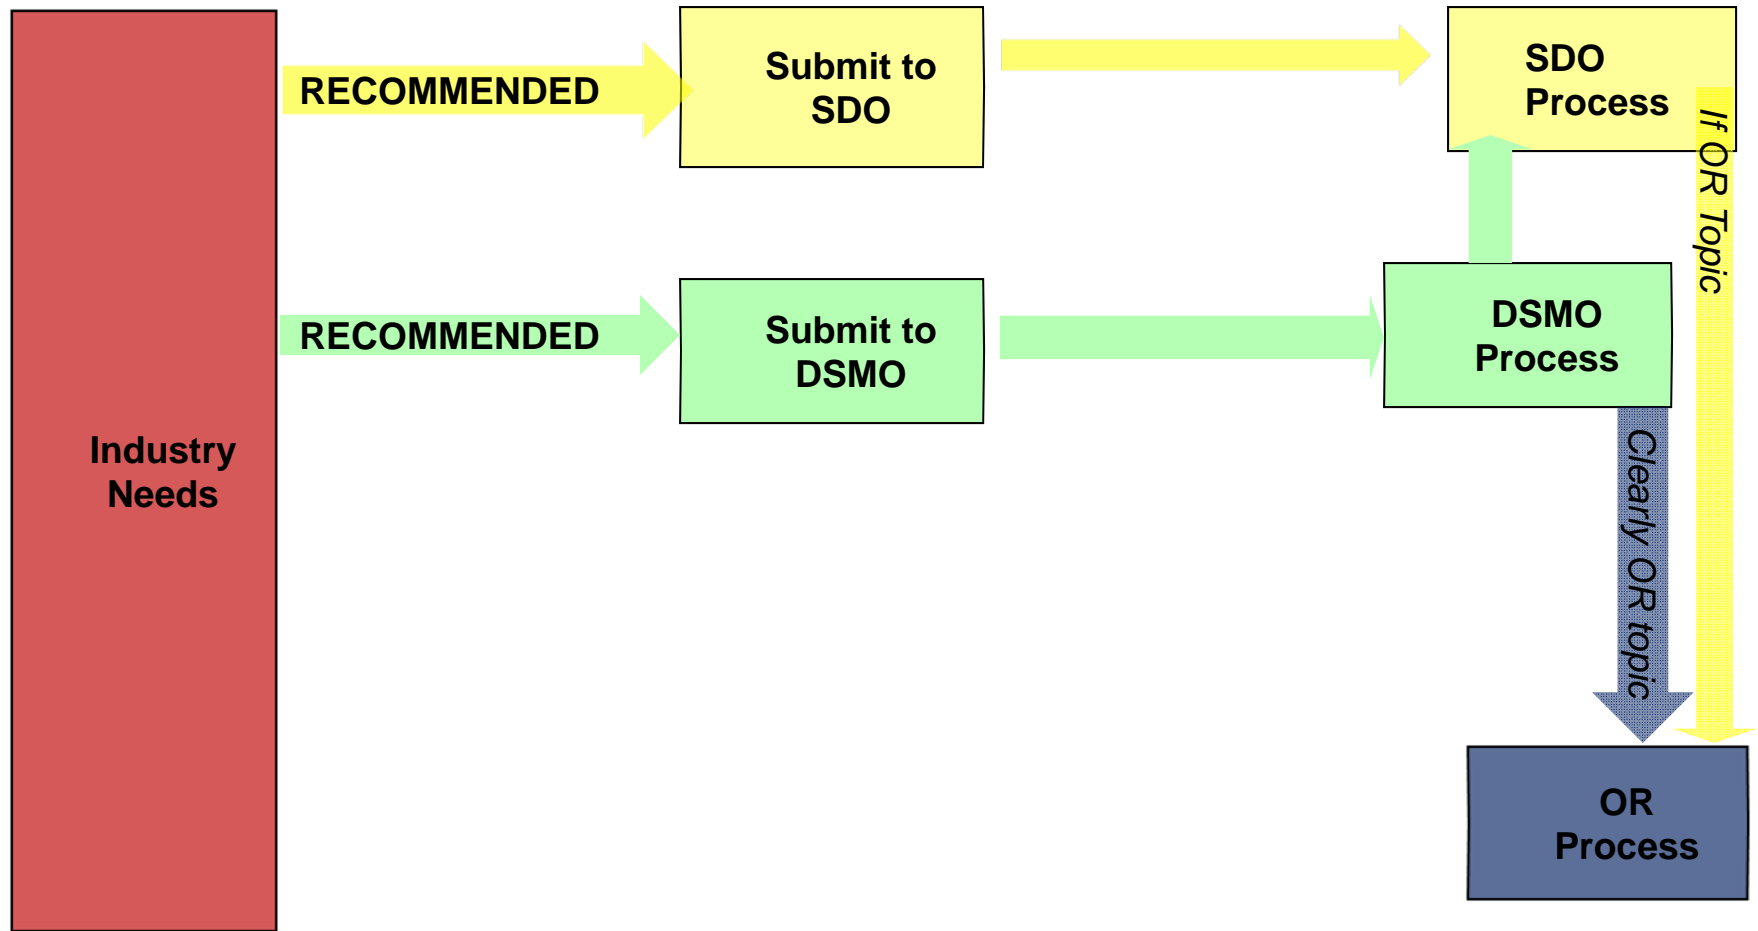

The DSMO recommend the Operating Rule process be interjected into the existing processes.

# HIPAA Process with Operating Rules - Detailed

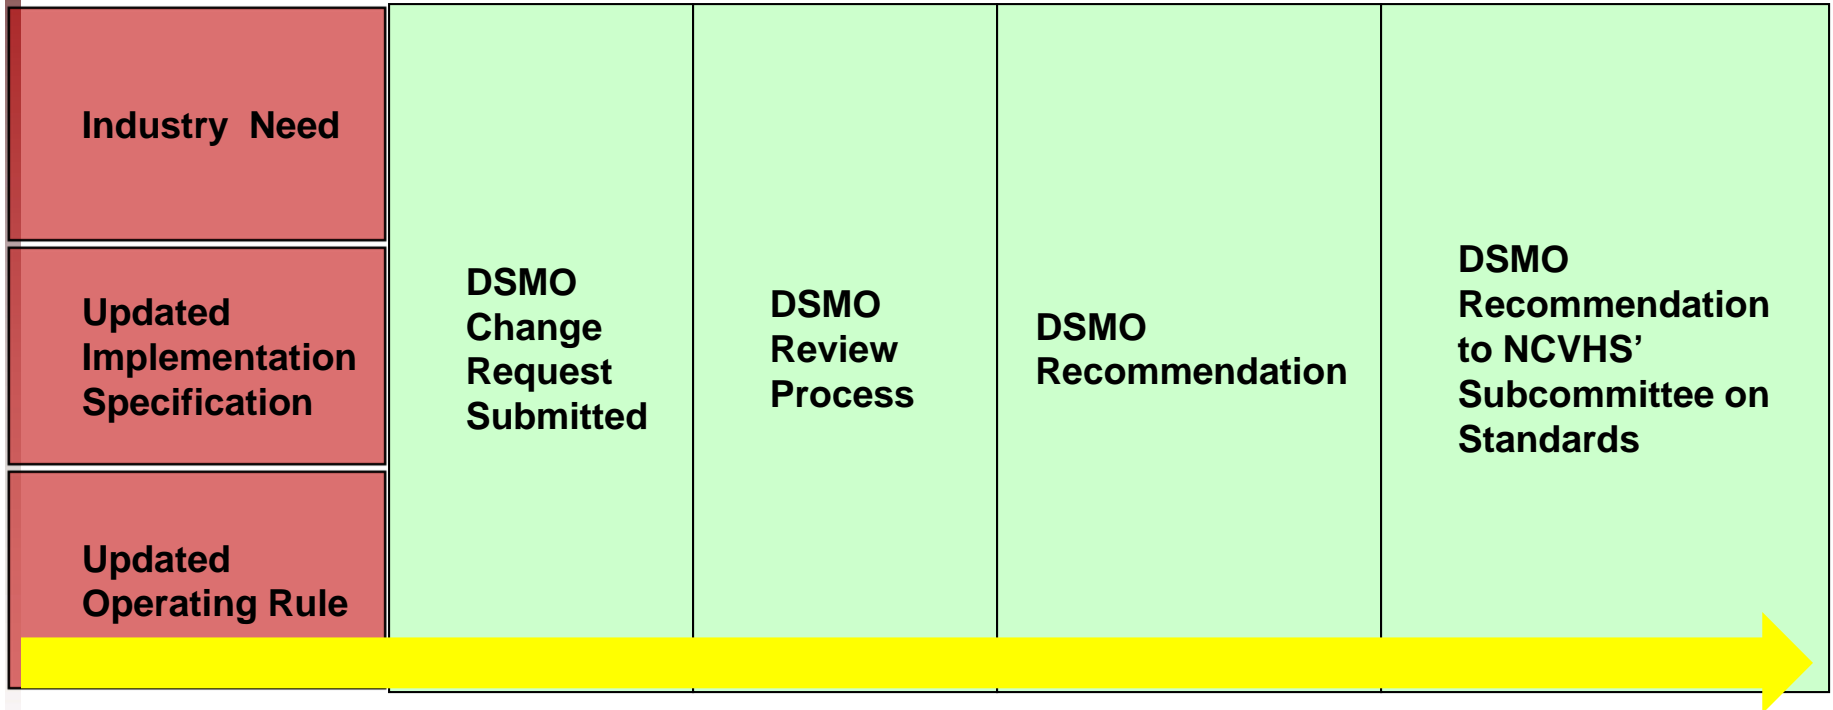

Reality is industry requests can come in through multiple entry points and will continue unless entry points are removed.

# Industry Requests

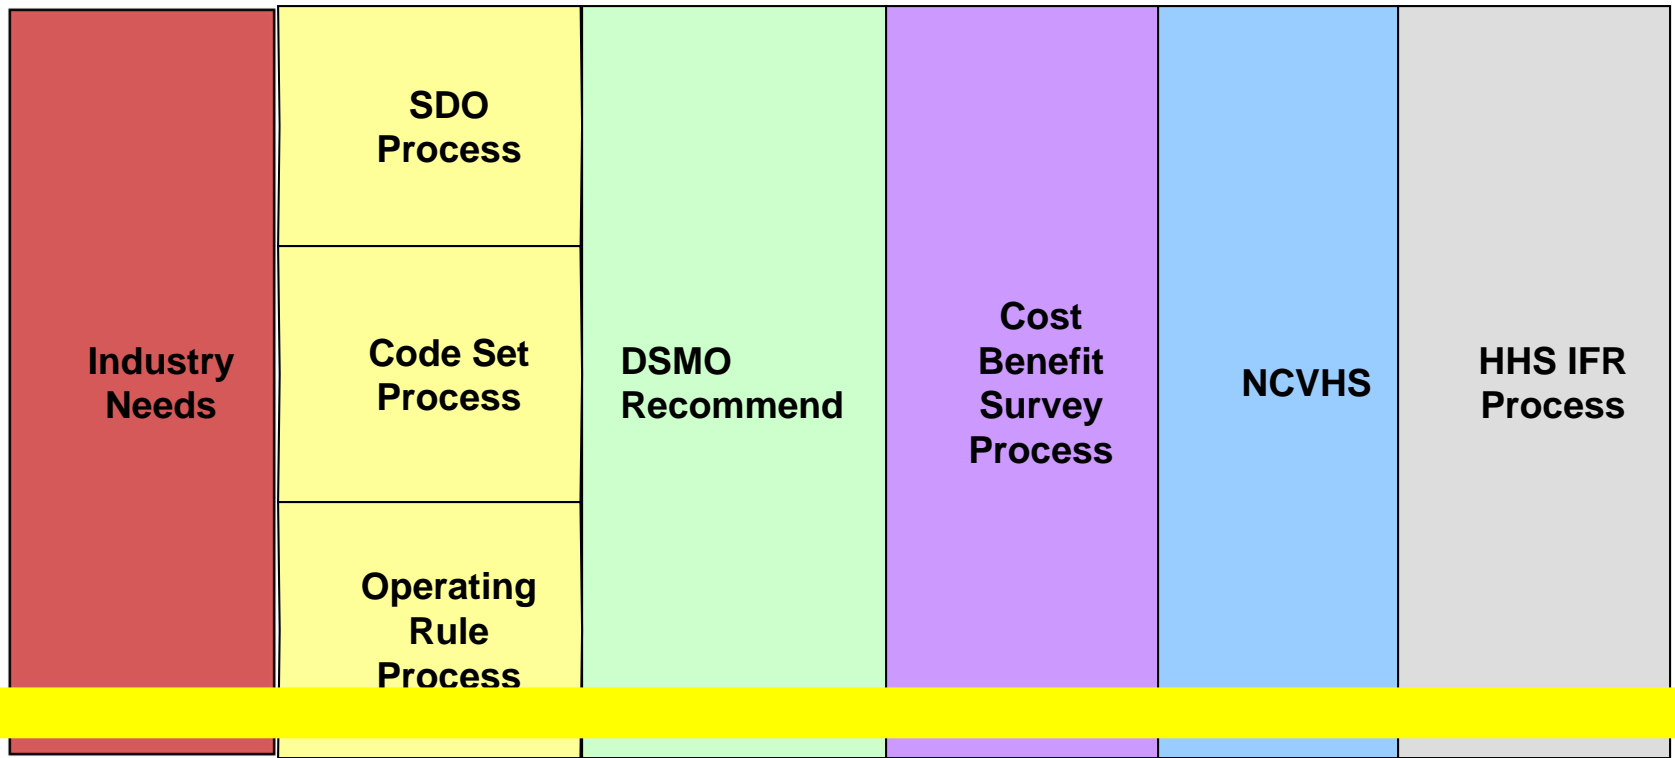

The DSMO recommend, based on industry guidance and practice, that the entry points be the DSMO or the SDO.

# DSMO Process

The DSMO process is used for change requests, and to start the process of an updated implementation specification or operating rule moving into regulation.

# HIPAA Process with Operating Rules

This provides the entrance of operating rules into the common processes that the industry understands.
