

# A National Health and Social Data Ecosystem

## CMS Data Users View

# Making CMS Data Geographically Useful

# Recommendations

- **Create a Data Access and Use Program with two primary missions:**
  - **Add value to data before you serve it up**
    - Add important literals (DRG, MDC, ICD)
    - Add accurate geographical tags
  - **Assist users in consuming intelligently**
    - Improve search capabilities
    - Improve data documentation
    - Supply data quality and completeness information
