Using Sub-county Data to Promote Multi-sector Approaches for Community Health and Well-being

Leah Hendey
Deputy Director of NNIP
Washington, DC
SEPTEMBER 27, 2016

NNIP NATIONAL NEIGHBORHOOD INDICATORS PARTNERSHIP

BETTER DATA. BETTER DECISIONS. BETTER COMMUNITIES.

National Neighborhood Indicators Partnership

- Collaborative effort of Urban Institute and 30 *local data intermediaries* since 1996

- Local data intermediaries:

  – Assemble, transform, and maintain data

  – Disseminate information and apply the data to achieve impact

  – Use data to strengthen civic capacity and governance

The NNIP Model of a Local Data Intermediary

- Build and operate an information system with **recurrently updated data** on **neighborhood conditions across topics** in its local area;

- **Facilitate** and promote the direct **practical use of data** by community and government leaders in community building and local policymaking; and

- Giving emphasis to using information to **build the capacities of institutions and residents in distressed neighborhoods.**
